

GIVERIGHT

Corporate Philanthropy for NetSuite

Efficient, Meaningful
and Measureable

GiveRight Corporate Philanthropy for NetSuite allows companies to identify causes and organizations for direct funding. The application is a complete grantmaking module that includes functionality for defining programs and initiatives, receiving applications, managing grants, and tracking expenses. It also facilitates good communication between stakeholders to ensure that you are selecting the right partners and causes for your organization.

BENEFITS

Creates Positive Social Impact

Partnering with a nonprofit organization or focusing on a specific cause for fundraising has numerous benefits. Driving funds toward an issue that positively impacts the lives of many is important -- no matter what cause you choose.

Improves Customer Relations

Companies benefit from increased brand awareness and improved brand perception. Customers see the positive impact from the grants your company makes in their communities and their goodwill is reciprocated back to your brand.

Tracks Projects and Expenses

Having financial controls for supported projects, well-defined budget allocations and easy access to reporting create successful philanthropic engagements for your company. Charities are provided easy access through NetSuite's supplier portal to upload expense data.

Generates New Opportunities, Innovation, and Competitive Advantage

Companies establish a closer connection with their communities providing a deeper understanding of the challenges faced by customers and recognition of new opportunities for innovation and market creation.

FEATURES

Funding Evaluation

GiveRight recommends a team of stakeholders from across your company to evaluate grant proposals. Built-in workflows facilitate this process within NetSuite, automatically notifying each stakeholder when a new partner or grant is in the system for review. The application also tracks partnership details, such as agreements, specific projects, expenses, and events.

Applications Tracking

GiveRight allows nonprofits to submit applications and letters of inquiry to express interest in your company's funding opportunities. Attachments, budget estimates, and others are saved via NetSuite's document management system.

Grants Management

CSR Directors can monitor grants at intervals to ensure compliance with terms and conditions set forth by your company. Budgets can be established for specific projects and your grants linked to those projects. GiveRight allows projects to be funded by many grants, and a single grant to fund multiple projects. Grant recipients can use the system to share expenses, results, and outcomes that your donations are providing. This data and resulting takeaways may result in even more impactful efforts.
